

**OVERVIEW OF TESTING CONDUCTED BY PROSOCO, Inc.  
FOR PROLINE STONE, ALLENTON, WI  
PROJECT No. 0305-04**

Three types of cast stone were submitted for testing using PROSOCO's new construction cleaning and water repellent products. **New construction cleaning** was performed using PROSOCO's new construction cleaners to evaluate effective removal of excess mortar and related new construction soiling. **Surface Alteration** on the cast stone was evaluated visually based upon perceived discoloration/etching of the submitted samples. **Graffiti Control** testing was evaluated on the cast stone samples to determine which PROSOCO product(s) are most effective at repelling and facilitating the removal of graffiti; in addition to determining the most effective product to remove graffiti from treated and untreated samples. **Protective water repellent** testing was performed to evaluate water repellency provided by PROSOCO's water repellents. **Color Enhancement** evaluation was based on the ability of PROSOCO product(s) to enhance the natural color of the submitted cast stone samples.

The attached report provides information about the PROSOCO products tested and descriptions of the test methods. The report includes test results as well as conclusions and recommendations. Recommendations for cleaning, limiting surface alterations, graffiti control, water repellent, and color enhancement treatments for each type masonry unit are also provided in the chart below.
