

OVERVIEW OF TESTING CONDUCTED BY PROSOCO, Inc.
FOR WATKINS CONCRETE BLOCK COMPANY, INC., OMAHA, NE

PROJECT No. 0411-02

Three integrally colored split-face blocks and one integrally colored smooth-face block, all with large, small and fine aggregate were submitted for testing using PROSOCO's new construction cleaning, color uniformity, water repellent products, and graffiti control products. **New construction cleaning** was performed to evaluate effective removal of excess mortar, and related new construction soiling. **Color Uniformity** was evaluated to determine the optimal dilutions of PROSOCO's new construction cleaners to provide a uniform appearance. **Protective Water Repellent** testing was performed to evaluate water repellency provided by PROSOCO's water repellents. **Graffiti Control** testing was evaluated to determine which PROSOCO product(s) are most effective at repelling and facilitating the removal of graffiti; in addition to determining the most effective product to remove graffiti from treated and untreated samples.

The attached report provides information about the PROSOCO products tested and descriptions of the test methods. The report includes test results as well as conclusions and recommendations. Recommendations for new construction cleaning, color uniformity, water repellent, and graffiti control treatments are also provided in the chart below.
