**Overview of Testing Conducted By PROSOCO, Inc.  
Masolite, Fort Wayne, IN  
Project No. 0505-12 PTP**

One type of ground-face and five types of split-face integrally colored CMU's, nine types of split-face retaining walls and six types of concrete pavers, all with large, small and fine aggregate were submitted for testing using PROSOCO, Inc.'s new construction cleaning products, water repellents, graffiti control products, stain repellents and color enhancement products. **New Construction Cleaning** was performed to evaluate effective removal of excess mortar, and related new construction soiling. **Color Uniformity** was evaluated to determine the optimal dilutions of PROSOCO's new construction cleaners to provide a uniform appearance. **Protective Water Repellent** testing was performed to evaluate water repellency provided by PROSOCO's water repellents. **Graffiti Control** testing was evaluated to determine which PROSOCO product(s) are most effective at repelling and facilitating the removal of graffiti. **Stain Repellent** testing was conducted to determine which PROSOCO product(s) are most effective at repelling and facilitating the removal of stains. **Color Enhancement** was also evaluated.

The attached report provides information about the PROSOCO products tested and descriptions of the test methods. The report includes test results as well as conclusions and recommendations. Recommendations are also provided in the chart below.

Apply all products in accordance with the manufacturer’s recommendations provided on container labels and product data sheets. On-site testing should be conducted to determine the most appropriate cleaning, water repellent, or stain repellent products and procedures for a particular project. See product literature for additional application and safety information.
