**Overview of Testing Conducted By PROSOCO, Inc.
Whitacre-Greer: Clay Pavers, Alliance, OH
Project No. 0506-12**

Seven types of clay pavers were submitted for testing to PROSOCO Inc.'s Testing Laboratory with a request to evaluate new construction cleaning products and evaluate the products for any surface alterations. Additionally, the effectiveness of water repellents, stain repellents and color enhancement products was evaluated. **New construction cleaning** was performed to evaluate effective removal of excess mortar, and related new construction soiling. **Protective Water Repellent** testing was performed to evaluate water repellency provided by PROSOCO's water repellents. **Stain Repellent** testing was conducted to determine which PROSOCO product(s) are most effective at repelling and facilitating the removal of stains. **Color Enhancement** was also evaluated.

The attached report provides information about the PROSOCO products tested and descriptions of the test methods. The report includes test results as well as conclusions and recommendations. Recommendations are also provided in the chart below.

Apply all products in accordance with the manufacturer's recommendations provided on container labels and product data sheets. On-site testing should be conducted to determine the most appropriate cleaning, water repellent, or stain repellent products and procedures for a particular project. See product literature for additional application and safety information.
