**Overview of Testing Conducted By PROSOCO, Inc.**  
**Endicott Clay Products**  
**Fairbury, NE**  
**Project No. 0509-02**

Five types of glazed clay brick were submitted to PROSOCO, Inc.'s Testing Laboratory with a request to determine the optimal concentration of cleaner for complete removal of mortar while limiting any potential surface alterations during new construction cleaning operations. Additionally, the effectiveness of water repellents and graffiti repellents suitable for glazed clay brick were evaluated. **New construction cleaning** was performed to evaluate effective removal of excess mortar, and related new construction soiling. **Protective Water Repellent** testing was performed to evaluate water repellency provided by PROSOCO's water repellents. **Graffiti Control** testing was evaluated to determine which PROSOCO product(s) are most effective at facilitating the removal of graffiti. The attached report provides information about the PROSOCO products tested and descriptions of the test methods. The report includes test results as well as conclusions and recommendations. Recommendations are also provided in the chart below.
