**Overview of Testing Conducted By PROSOCO, Inc.  
Town & County Landscape Supply, Co., Markham, IL  
Project No. 0509-17**

Three types of natural stone were submitted to PROSOCO, Inc.'s Testing Laboratory with a request to determine if application of the evaluated cleaners will produce any surface alteration during new construction cleaning operations. Additionally, the effectiveness of water repellents, stain repellents, and color enhancement products suitable for natural stone were evaluated. **Limiting Surface Alterations** were evaluated to determine if any discoloration or erosion/etching of the samples are created during new construction cleaning operations. **Protective Water Repellent** testing was performed to evaluate water repellency provided by PROSOCO's water repellents. **Stain Repellent** testing was conducted to determine which PROSOCO product(s) are most effective at repelling and facilitating the removal of stains. **Color Enhancement** was evaluated for its ability to provide color enhancement to the submitted samples. The attached report provides information about the PROSOCO products tested and descriptions of the test methods. The report includes test results as well as conclusions and recommendations. Recommendations are also provided in the chart below.
