**Overview of Testing Conducted By PROSOCO, Inc.  
Hanson Brick – Ogden Plant  
Project No. 0511-07**

Thirty-six types of concrete brick were submitted to PROSOCO, Inc.'s Testing Laboratory with a request to determine the optimal cleaning/cure time combination to most efficiently remove Type S mortar from the submitted concrete brick while leaving the external surface looking most like the natural untreated surface. Additionally, the effectiveness of water repellents and graffiti control products suitable for concrete brick was evaluated. **New Construction Cleaning** was performed to evaluate effective removal of excess mortar, and related new construction soiling. **Protective Water Repellent** testing was performed to evaluate water repellency provided by PROSOCO, Inc.'s water repellents. **Graffiti Control** testing was evaluated to determine which PROSOCO, Inc. product(s) are most effective at repelling and facilitating the removal of graffiti. The attached report provides information about the PROSOCO, Inc. products tested and descriptions of the test methods. The report includes test results as well as conclusions and recommendations. Recommendations are also provided in the chart below.
