RE: Build America Buy America Act

PROJECT NAME:

Date:

Thank you for your inquiry regarding whether PROSOCO's SS ThruWall, SS ThruWall Coastal, and stainless steel accessories (drip edge, termination bar, corners, end dams, and L-bracket) meet the requirements of the Build America Buy America Act (BABA). All of these products feature type 304 or type 316 stainless steel components, which comprise the majority of the item's cost.

All of PROSOCO's stainless steel is sourced from manufacturers who produce the product in the United States of America. These flashing products are manufactured at our mill in Sanford, Maine, USA. These products all exceed the minimum requirement of 55% domestically produced component costs.

If you have any questions or need assistance with this project, please don't hesitate to let us know.

Best regards,

A handwritten signature in black ink that reads "Demian Weaver".
