DESCRIPTION AND USE

Sure Klean® T-1087 Special Poultice Additive is a specialized product developed for removal of certain metallic salts and other deep staining from natural stone and masonry surface.

Sure Klean® T-1087 Special Poultice Additive is a clear liquid designed to be mixed with Sure Klean® Marble Poultice or Stand Off® Poultice Powder and fresh water. Properly prepared, the mixture produces a thick creamy paste which is designed for trowel application to the stained stone or masonry surface.

Limitations
- Should not be mixed or applied at temperatures below freezing. Wet poultice will freeze.
- Surface and air temperatures should be at least 50°F. Cold temperatures adversely affect the cleaning properties of Sure Klean® T-1087 Special Poultice Additive.

TYPICAL TECHNICAL DATA

T-1087 Special Poultice Additive
- FORM: Clear liquid
- SPECIFIC GRAVITY: 1.08
- pH: 11.0
- WT./GAL: 9.0 lbs
- FLASH POINT: None

PREPARATION

Protect people, vehicles, property, painted surfaces, plants and all surfaces not meant for treatment from product, residue, rinse, splash and wind drift. Divert/protect pedestrian traffic.

Surface and Air Temperatures

Surface and air temperatures should be at least 50°F. Application when temperature is below freezing or will be overnight may harm masonry. If freezing conditions exist before application, let surface thaw.

APPLICATION

Before use, read “Preparation” and “Safety Information.” ALWAYS TEST each type of surface and stain for product compatibility and dwell-time before full-scale cleaning. Test at air and surface temperatures similar to those expected for overall cleaning. Temperature affects product performance.

T-1087 Special Poultice Additive should be mixed with Marble Poultice or Poultice Powder at a rate of one half pint of liquid additive to one pound of dry poultice powder.

The prepared poultice mixture provides a coverage rate of approximately 4 square feet per pound of dry poultice powder.

Mixing Procedures
1. Pour or shovel the dry poultice powder into a suitable mixing container.
2. While mixing, add one half pint of T-1087 Special Poultice Additive for each one pound of poultice powder.
3. Continue mixing and slowly add sufficient clean water to bring the wet paste to a trowelable consistency.

Application Instructions
1. Apply the prepared poultice mix using a plasterer’s trowel or a wide, flexible taping knife. Apply the poultice to a uniform thickness of approximately 1/4 inch.
2. Using a light polyethylene film or similar moisture barrier, cover the poulticed area. Press the film against the poultice and tape or otherwise seal off the edges to slow the evaporation of the liquid cleansers.
3. Allow the poultice to remain on the surface for 12 to 24 hours.
4. Remove the polyethylene or similar moisture barrier. Allow the poultice to dry completely, 2–4 hours. The poultice surface develops cracks as it contracts and dries. A fully developed network of cracks indicates the poultice is completely dry. Dry times may vary with environmental conditions such as temperature, wind and humidity.
5. After the poultice is completely dry, carefully scrape the poultice from the surface.
6. Using a stiff-fibered scrubbing brush and fresh water, wash the surface thoroughly removing all traces of the poultice paste.
7. Repeat poultice procedures where necessary.

SAFETY INFORMATION

Caution. Causes irritation. Harmful or fatal if swallowed or inhaled. Keep out of the reach of children. Read precautionary measures carefully. For professional use only.

Precautionary Measures
Do not get in eyes, on skin or clothing. Applicators should wear solvent and alkali resistant safety goggles, rubber gloves, and other personal safety equipment so as to avoid splash to skin and eyes. Wash thoroughly after handling. Handle and store in rubber or plastic containers only.

Protect foliage and painted surfaces by using polyethylene or other proven protective material. Avoid contact with auto and pedestrians by protecting or diverting such traffic. Do not alter or dilute product except as specified on label. Do not use for applications other than specified.
First Aid

Skin and Eye Contact: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. Call a physician.

Inhalation: Remove to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. If breathing is difficult, call ambulance or proceed to hospital emergency room. Call a physician.

Ingestion: Do not induce vomiting. Drink large amounts of water. Call a physician.

24 Hour Emergency Information: INFOTRAC at 800-535-5053

WARRANTY

The information and recommendations made are based on our own research and the research of others, and are believed to be accurate. However, no guarantee of their accuracy is made because we cannot cover every possible application of our products, nor anticipate every variation encountered in masonry surfaces, job conditions and methods used. The purchasers shall make their own tests to determine the suitability of such products for a particular purpose.

PROSOCO, Inc. warrants this product to be free from defects. Where permitted by law, PROSOCO makes no other warranties with respect to this product, express or implied, including without limitation the implied warranties of merchantability or fitness for particular purpose. The purchaser shall be responsible to make his own tests to determine the suitability of this product for his particular purpose. PROSOCO's liability shall be limited in all events to supplying sufficient product to re-treat the specific areas to which defective product has been applied. Acceptance and use of this product absolves PROSOCO from any other liability, from whatever source, including liability for incidental, consequential or resultant damages whether due to breach of warranty, negligence or strict liability. This warranty may not be modified or extended by representatives of PROSOCO, its distributors or dealers.

CUSTOMER CARE

Factory personnel are available for product, environment and job-safety assistance with no obligation. Call 800-255-4255 and ask for Customer Care - technical support.

Factory-trained representatives are established in principal cities throughout the continental United States. Call Customer Care at 800-255-4255, or visit our web site at www.prosoco.com, for the name of the Sure Klean® representative in your area.
