

PROSOCO®

Blended Densifier

Substrate:
Concrete

Task:
Concrete Floor
Finishing

Surface Type:
Horizontal

Location:
Interior, Exterior

Silicate hardener for steel-troweled or burnished finished concrete.

Specially formulated with a blend of silicates, Consolideck® Blended Densifier penetrates steel-troweled and burnished concrete floors and reacts with the concrete to quickly create a harder, denser surface. Economical Blended Densifier is safer and easier to apply than conventional sodium silicate hardeners.

- Easy, one-step application.
- No scrubbing. No flushing. No caustic wastewater.
- Provides better abrasion resistance than conventional hardeners.
- Reacts quickly. Floors can be opened to traffic once dry.
- Treated surfaces are easier to maintain.
- May enhance or darken certain substrates.

You. Us. The project.
