# HEAT

## HIGH PERFORMANCE BURNISHING PAD

Heat - 91.5 degrees - from friction melds Consolideck® LSGuard™ into concrete floors for gloss and durability beyond compare. And no pad gives you 91.5 faster and longer than the Consolideck HEAT High-Performance Burnishing Pad.

- Embedded heat-shield stops rising heat and bounces it back to the floor.
- Double-sided for double service life.
- All-natural fibers glued together with non-transferring resin - no resin trails left on floor.
- It's custom-made for burnishing LS Guard , but also pops the shine on any hardened/densified floor.
- Available in 7.5, 20, 21, 24, 27 inch sizes.
- Costs less than most comparable pads.

CONCRETE FLOORING PRODUCTS

**“I ran a diamond (impregnated) pad on the floor and got a gloss reading of 49. I went over it with the Consolideck® pad and it went up to 54. You could see the difference. It’s the heat that does it.”**

- Rob Harris  
Flesner Floors, Payson, IL

**“I get 30,000 square feet out of these pads, easy. I get done faster and they cost me less than any other pad I’ve used. Results? I get gloss-meter readings of 70 to 80. The secret is the heat.”**

- Ron Rynder  
On Site Services, Atlanta, GA

## **WE ARE WHERE YOU ARE.**

Prosoco’s nationwide network of field reps and technical advisers from coast to coast are at the ready to help solve your biggest problems, your smallest problems and everything in between.
