

PROSOCO®

First Cut

Substrate:
Concrete

Task:
Concrete Floor
Finishing

Surface Type:
Horizontal

Location:
Interior, Exterior

Reduce scratches, extend the life of your diamonds.

Consolideck First Cut makes the wet-grinding process go faster, and saves time on subsequent steps. The solution lifts concrete slurry solids away from the surface, suspends them, and clears the path for the diamonds. First Cut is specially formulated to reduce scratches and increase the efficiency of diamonds when wet-grinding.

- Minimizes scratches created during lower-grit diamond tooling steps
- Makes post-grinding clean-up easier
- Reduces labor and tooling costs
- Extends the life of diamonds and shortens the project time line

You. Us. The project.
