PROSOCO.COM

New construction

Compared to the cost of a new building, the price of new construction cleanup is no more than an afterthought. Done correctly, it brings out the full intended beauty of the building's appearance. It adds an equal shine to the contractor's reputation.

But if the exterior is cleaned incorrectly, the building — and your reputation — may be ruined beyond repair.

PROSOCO is here to help you succeed. When it's time to clean off the mortar and grout smears, oil, grease, job dirt and other stains, we've got the products, information and technical support you need to leave your project — and your reputation — looking sharp.

The industry leader

Since 1956, Sure Klean® products have been the No. 1 choice of thousands of contractors, architects and engineers nationwide. Professionals recognize the Sure Klean® line as the most effective, reliable and practical products for final cleanup on new construction projects. Sure Klean® also features specialty stain removers for your most difficult cleaning problems.

After the project is clean protect your investment with one of PROSOCO's Sure Klean® Weather Seal, Defacer Eraser® or Stand Off® protective treatments.

Weather Seal Siloxane WB Concentrate

Water-based protective treatment penetrates and bonds deep within concrete, brick and most stone for long-lasting, invisible weatherproofing.

Weather Seal Siloxane PD (Predilute)

Ready-to-use protective treatment is ideal for field or in-plant application of vertical or horizontal concrete, brick and most masonry and stucco surfaces.

Weather Seal Blok-Guard® & Graffiti Control Ultra

New Blok-Guard® & Graffiti Control Ultra takes the power of a solvent-based silicone formula and makes it VOC-compliant. Use it nationwide anywhere graffiti and weather threaten masonry and concrete, new or old.

Weather Seal Natural Stone Treatment WB

Low-odor, water-based solution of potassium methyl silicate repels water on a wide range of natural stone and masonry surfaces without changing appearance.

Weather Seal Blok-Guard® & Graffiti Control II

Colorless, breathable treatment blocks graffiti and water penetration of porous masonry. Water-based treatment meets all known AIM VOC regulations nationwide.

Consolideck® Saltguard® WB

Protects horizontal and vertical concrete against water invasion, salt attack, and the resulting cracking, spalling and rebar corrosion.

Stand Off® SLX100® Water & Oil Repellent

Interior and exterior protective treatment blocks water, oil, food, and many other staining agents on natural stone and most masonry.

Trim Line

Masonry cleaners

CLAY MASONRY CLEANERS

600

General-purpose cleaner for masonry, tile and concrete.

- The No. 1-selling new masonry proprietary cleaner.
- Recommended by many brick, tile and mortar manufacturers.
- Safer than muriatic acid for new masonry surfaces.
- Fast and easy to apply -- use with cold-water rinse.
- Special wetting agents eliminate streaking.

Vana Trol®

Cleans new masonry specifically subject to vanadium, manganese and other metallic stains common to light-colored and white brick.

- Clings to masonry surface and breaks the grip of excess mortar and job dirt.
- Slow-drying to rinse clean without streaking.

101 Lime Solvent

Economical cleaner gets rid of mortar smears, job dirt and other normal construction stains on red and dark brick, and other masonry not subject to metallic stains.

- Removes construction dirt and excess mortar with a simple cold-water rinse.
- Safer than muriatic acid on colored mortar and dark-colored new masonry surfaces.
- Proven effective since 1954.

CONCRETE MASONRY CLEANERS

Custom Masonry Cleaner

Improves color depth and uniformity while cleaning tough construction staining off textured custom masonry surfaces.

- Gets rid of heavy efflorescence, embedded stains, rust and more.
- Improves bond of color coatings.
- Improves penetration of protective treatments.
- Concentrated for economy.
- Designed for use with pressure-water rinsing.

Enviro Klean® Safety Klean

Removes common job-site staining; safe for use around metal.

- Removes mortar smears and other common construction soiling.
- Has no hydrochloric or other traditional inorganic acids.
- Low-odor, non-fuming and water-rinsable.

Concrete products

Although builders have used concrete since the early 1900s, the substrate has special requirements that most cleaners don't address. That's why PROSOCO created a line of cleaners to handle the unique needs of concrete.

Light Duty Concrete Cleaner

General-purpose, non-etching cleaner removes common construction and atmospheric staining from smooth architectural and engineered concrete.

- Improves color uniformity and enhances appearance.
- Brightens white matrices.
- Safe for most pigmented concrete and colored mortar.
- Water-rinsable.

Efflorescence on concrete block

Heavy Duty Concrete Cleaner

Concentrated cleaner for scouring heavy and embedded stains off textured and colored concrete.

- Removes heavy efflorescence and embedded stains.
- Improves color uniformity of most standard concrete, colored concrete, precast block and concrete block.
- Designed for use with pressure-water rinsing.
- Improves bond of protective coatings/membranes.

Sure Klean products v. muriatic acid

Sure Klean® products are designed specifically to clean brick, concrete and tile.

Muriatic acid is often a by-product of steel or petroleum production.

Sure Klean® products are quality-controlled blends of several cleaning ingredients.

As a by-product, muriatic acid is unpredictable in strength and impure in content.

Sure Klean® products save time and labor costs by letting you clean much larger areas at one time.

Cleaning with muriatic acid is labor-intensive.

Sure Klean® products bring out the intended beauty of masonry, concrete and stone construction.

Muriatic acid can stain and burn your masonry and etch the mortar joints. Water penetrates more easily, leading to premature deterioration.

Sure Klean® products save time and money, and make reputations.

At any price, muriatic acid will cost you more than you thought possible.

Never go it alone. For problems or questions, contact your local PROSOCO distributor or field representative. Or call PROSOCO Customer Care toll-free at 800-255-4255.

Specialty stain removers

Even surfaces damaged by muriatic acid can be helped. PROSOCO has designed its line of Sure Klean® specialty stain removers for a variety of tough masonry-cleaning problems — including muriatic acid burn.

800 Stain Remover

Special cleaner for buff and white brick. Rids masonry of vanadium staining and other metallic discolorations. Also cleans off acid burn and straw stains.

- Removes tough metallic stains quickly and easily.
- Recommended for surfaces using colored mortar.
- Water-rinsable.

White Scum Remover

Breaks the grip of white scum deposits that water and standard cleaners can't budge.

- Dissolves tough insoluble salts fast.
- Corrects surface stains from improper cleaning.
- Restores natural color to dull, "washed-out" masonry.
- Water-rinsable.

Asphalt & Tar Remover

Ideal for removing asphalt, tar (roofer's stain), and caulking stains from masonry and concrete.

- Easy application.
- Water-rinsable.
- Excellent for spot cleaning chewing gum, crayon and lipstick stains.

Ferrous Stain Remover

Takes iron, vanadium, manganese and other metallic stains out of brick, concrete and most stone.

- Corrects acid burn and straw staining.
- Water-rinsable.
- Easily applied.
- Works in minutes.

Rust on concrete block

Rust

Description - Red, orange or brown staining on the face of the substrate itself or concentrated along the edges of the substrate.

Green vanadium on light brick

Green vanadium

Description - Yellow, green, green/brown or purple stains in the heart of light-colored brick units common in new or water-saturated construction.

Removal -

Sure Klean 800 Stain Remover

Brown manganese on brick

Brown manganese

Description - Tan, brown or gray staining concentrated along mortar joints of brown, gray or other manganese-colored brick.

Removal -

Sure Klean 800 Stain Remover

White scum on brick

White scum

Description - Uneven white or gray stain on brick face or mortar joints. Often appears as vertical run marks. Does not disappear when wet.

Removal -

Sure Klean White Scum Remover

Tar on brick

Asphalt and tar

Description - Black or dark brown stains or tacky films.

Removal -

Sure Klean Asphalt & Tar Remover

Sure Klean Fast Acting Stripper

Acid burn on brick

Acid burn

Description - Uneven yellow or gold stain on brick face and in mortar joints. Stained areas may also exhibit severe etching or mortar discoloration.

Removal -

Sure Klean 800 Stain Remover on brick; test Sure Klean Light Duty Concrete Cleaner on concrete and block; test Sure Klean Custom Masonry Cleaner on concrete and block; test Sure Klean Heavy Duty Concrete Cleaner on standard gray concrete and block.
