

Notes

Restoration cleaning

Turn back the hands of time.

Historical preservation is our legacy at PROSOCO. We're proud of our part in pioneering the cleaning and restoration industry in 1938. Another part of our legacy? Our longstanding and undeterred commitment to you, our customer.

We've proven time and time again that we'll do anything possible to help our customers succeed. We don't just sell superior and proven cleaners and protective treatments. We'll be right there with you on the job site to ensure that every little aspect goes as smoothly as possible.

When it comes to restoration, we know our stuff. We know that time is no friend to masonry buildings. It can lead to carbon crusting, atmospheric staining, paint, biological soiling and other fingerprints that occur naturally over time. For those stains and more, we've got the products, information and technical support you need to leave your project – and your reputation – looking sharp.

The industry leader

Since 1954, Sure Klean® products have been the No. 1 choice of thousands of contractors, architects and engineers nationwide. Professionals recognize the Sure Klean® line as the most effective, reliable and practical products for restoration cleaning of aged and historic architecture. Sure Klean®, Enviro Klean® and Stand Off® products also feature specialty stain removers for difficult cleaning problems.

Sure Klean exterior restoration cleaners

Our line of easy-to-apply Sure Klean® products are designed to clean the very dirtiest of building exteriors – whether it's built with limestone, granite, brick, sandstone, terra cotta, cast stone or concrete. We've got the solution for you.

Light Duty Restoration Cleaner

Low-odor, gelled cleaner rids dense masonry surfaces of light-to-moderate atmospheric and oxidation staining. Ideal for granite and other dense surfaces, the cleaner removes pollution and mineral streaks from most window glass.

Restoration Cleaner

Dissolves moderate-to-heavy atmospheric staining on brick, unpolished granite, sandstone and much more. Dilutes with clean water for economy and jobsite flexibility.

Heavy Duty Restoration Cleaner

Concentrated cleaner breaks the grip of heavy atmospheric staining on brick, unpolished granite, sandstone and terra cotta. Dilutes with clean water for economy and job site flexibility.

766 Limestone & Masonry Prewash

Non-acidic, alkaline gel dissolves heavy carbon crusts. Great for spot cleaning. Follow with neutralizing treatment of Limestone & Masonry Afterwash or other appropriate restoration cleaner. Easy to apply with brushes or rollers, this prewash won't harm window glass.

Limestone & Masonry Afterwash

Neutralizes and brightens surfaces treated with 766 Limestone & Masonry Prewash. Concentrated for economy and easy to apply with brushes or rollers, Limestone & Masonry Afterwash removes cleaning residues, restoring limestone and other masonry to its natural color and appearance. Also contains no hydrofluoric or muriatic acid.

Limestone Restorer

This one-step cleaner frees unpolished limestone, cast stone and concrete from atmospheric stains, mildew and more without bleaching or discoloration. Won't harm window glass.

Asphalt & Tar Remover

Ideal for removing asphalt, tar, grease, oil, hydraulic fluid and more from masonry and concrete. The easy-to-apply solution also pulls out acrylic, stearate and chlorinated rubber sealers and is excellent for spot-cleaning chewing gum, crayon and lipstick stains.

Enviro Klean exterior restoration cleaners

Enviro Klean® products were created to meet a wide range of environmental concerns, from lead-based paint removal to biological stains that are immune to conventional cleaners.

SafRestorer®

Non-fuming restoration cleaner breaks the grip of stubborn atmospheric and carbon staining on masonry and stone for easy rinsing away. Containing no mineral acids, SafRestorer won't etch or discolor most glass or architectural metals.

EK Restoration Cleaner

Near-neutral cleaner scours off embedded dirt, carbon and other atmospheric pollutants while simplifying wastewater handling. This water-rinsable formula contains no hydrofluoric acid and is perfect for projects where harsh acids, caustics and solvents aren't allowed.

ReKlaim

Strips away difficult mold, mildew and atmospheric staining from vertical and horizontal masonry surfaces. Easy-to-apply formula also cleans wood as well as masonry.

ReVive

Safely removes mold and mildew staining and atmospheric staining from horizontal and vertical masonry. ReVive is safe for interior and exterior applications.

EIFS Clean 'N Prep

Non-caustic, non-corrosive, solvent-free cleaner rids sensitive Exterior Insulated Finish Systems of algae, mud, grease, oil, food and other stains. It's also effective on non-EIFS surfaces like masonry, metal and wood.

Exterior & interior restoration cleaners

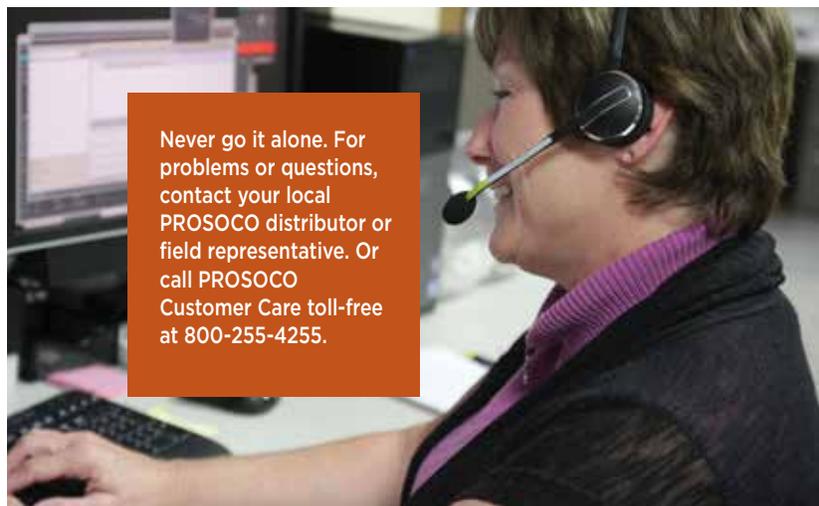

The value of a stone, tile or masonry surface declines with every drop of grease, grime, food, oil, smoke or other contaminant. Stand Off® and Enviro Klean® products are made to restore and maintain the beauty and value of older and historic masonry, tile and stone.

2010 All Surface Cleaner

Safely cleans light to moderate staining on masonry and just about everything else. Using no harsh acids, caustics or solvents, this cleaner/degreaser is potent enough for industrial use and flexible enough for household cleaning inside and out. Also water-rinsable.

Oil & Grease Stain Remover

Poultice cleaner draws deep-seated oil, grease and other troublesome stains from driveways, walkways, patios and commercial and industrial floors. Requires no mixing or scrubbing and works on polished or unpolished masonry, including concrete, brick and most natural stone.

Never go it alone. For problems or questions, contact your local PROSOCO distributor or field representative. Or call PROSOCO Customer Care toll-free at 800-255-4255.

Interior restoration cleaners

Though not exposed to weathering, interior masonry suffers its own versions of soiling and staining. Smoke, body-oil films, water-related stains and damage, industrial soiling and more combine to degrade and deteriorate interior masonry.

Cleaning a building's interior poses unique challenges like lack of ventilation, restricted water-use and prevalence of non-masonry materials.

PROSOCO's interior restoration cleaners are designed from the ground up to meet these challenges and restore the original beauty of aging and historic interiors.

942 Limestone & Marble Cleaner

Ready-to-use, non-acidic cleaning gel removes surface and sub-surface staining from almost any masonry surface. This low-odor formula is safe for hard-to-clean polished marble.

Marble Poultice

Takes embedded staining out of polished stone or porous masonry without etching or discoloring acid-sensitive surfaces. Ideal for interior floors or walls, Marble Poultice is safe, odorless and non-acidic.

Consolidation treatments

Since the 1980s, conservators have used PROSOCO's Conservare® consolidation treatments to save much of North America's most spectacular and valued architecture from decay and loss. New York's Trinity Church, the U.S. Capitol, Indianapolis' Soldiers and Sailors Monument and countless other projects have gotten new leases on life, thanks to the stone-strengthening characteristics of these remarkable products.

HCT (Hydroxylating Conversion Treatment)

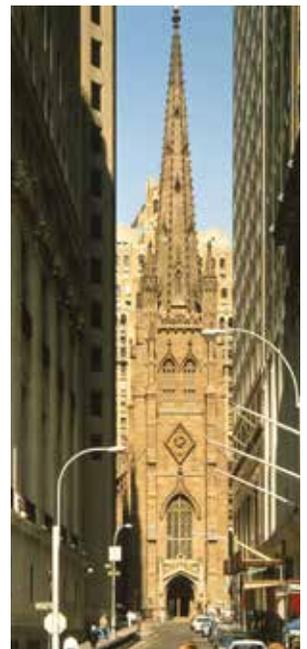

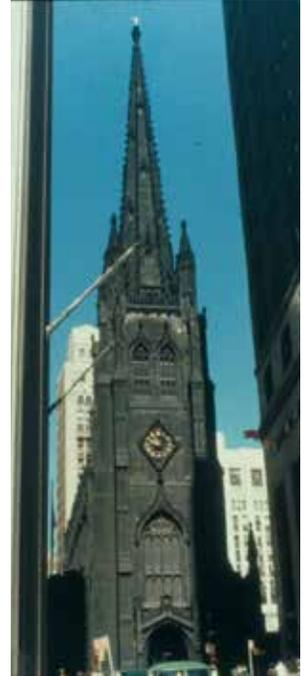

Patented Conservare® HCT dramatically increases the resistance of marble and limestone to acid rain, pollution and normal weathering. Without changing surface appearance, it strengthens deteriorating carbonate stone.

H100 Consolidation Treatment

This stone and masonry strengthener replaces the substrate's natural binding materials lost to weathering with an identical ethyl silicate cementing matrix. H100 also protects the strengthened stone from further weathering. Fast, tack-free drying means no dirt attraction.

OH100 Consolidation Treatment

OH100 is a ready-to-use consolidation treatment that stabilizes deteriorating masonry by replacing the substrate's natural binding material with silicon dioxide. Effective on most natural stone, brick, concrete, terra cotta, stucco and more, OH100 is fast-drying and doesn't attract dirt.

Paint strippers & coating removers

Multiple layers of paint and other coatings often hide masterpieces of masonry and stonework on and in older buildings. PROSOCO paint strippers and coating removers bring the hidden beauty to light.

SafStrip®

Quickly removes most high-strength paints and clear coats from masonry, concrete, wood and metal — without use of methylene chloride or methanol. Low-odor, easy-to-apply and spill-resistant, SafStrip requires no protective covering or surface neutralization.

SafStrip® 8

Neutral-pH stripping compound dissolves high-strength paints, coatings and graffiti without the methylene chloride or methanol of traditional paint strippers. Gel consistency means it's easy to apply and hard to spill.

Safety Peel 1

Ideal for lead-based paint abatement and other paint-stripping projects. The creamy paste traps potentially hazardous solids. Safety Peel 1 is then “peeled” off the surface for safe, simplified containment and disposal. Suited for interiors or exteriors, Safety Peel 1 contains no methylene chloride or methanol.

Heavy Duty Paint Stripper

Extended dwell-time stripper cuts through multiple layers of paint. Stays active 24 hours. Non-flammable and water-rinsable, the solution is easy to apply with a brush, roller or conventional airless sprayer.

Fast Acting Stripper

Water-rinsable stripper breaks the bond of the toughest epoxies, polyurethanes and other high-strength coatings. Fast Acting Stripper takes oil, grease and built-up coatings off concrete decks.

Dicone NC9

Non-caustic, non-flammable sealant and adhesive remover actually “digests” stubborn silicone residues other cleaners won’t touch. Ideal for immersion cleaning of parts and equipment, Dicone NC9 contains no chlorinated or aromatic solvents.

Dicone NC15 Gel

This fast-acting silicone digestant boasts a “gel” consistency for extended dwell-times and vertical application. Removes many types of oil and grease stains from porous surfaces within 30 minutes to 1 hour.

Paint & coatings removal

Coating	Product
Elastomeric coatings	Fast Acting Stripper Heavy Duty Paint Stripper Safety Peel 1 SafStrip
Graffiti-resistant coatings	Fast Acting Stripper Heavy Duty Paint Stripper SafStrip & SafStrip 8
Latex/house paint	Fast Acting Stripper Heavy Duty Paint Stripper SafStrip & SafStrip 8

Cleaning other masonry & concrete

Even masonry and concrete that isn't 100 years old gets dirty. Whether the problem is mortar and grout smears on new masonry construction, or oil and grease stains in concrete, PROSOCO has the solution. Learn what product is right for you by calling PROSOCO Customer Care at 800-255-4255.

800 Stain Remover®

Effectively removes green, brown and yellow vanadium stains most commonly found in buff/white brick. It also rids brick of acid burn, "straw stain" and other metallic or organic stains.

Ferrous Stain Remover

Removes metallic oxidation stains such as rust, manganese and other metallic discolorations from brick, stone and clay tile surfaces.

Sure Klean® Concrete Products

Although concrete has been used by builders since the early 1900s, it has special requirements that most cleaners don't address. That's why PROSOCO created a line of cleaners to handle the unique needs of concrete.

Light Duty Concrete Cleaner

General-purpose, non-etching cleaner removes common construction and atmospheric staining from smooth architectural and engineered concrete.

Heavy Duty Concrete Cleaner

Concentrated cleaner for scouring heavy and embedded stains off textured and colored concrete.

Custom Masonry Cleaner

Specially formulated for use on colored architectural concrete block. Improves color uniformity while ridding textured block of the worst in mortar smears, efflorescence, lime run and more.

Enviro Klean® SafEtch

Safely cleans and preps textured concrete for clear or pigmented coatings. It gets rid of excess mortar, embedded oil, dirt and other stains without using hydrochloric acid or other traditional inorganic acids.

Protective treatments

Weather Seal

Siloxane PD (Predilute)

is a ready-to-use, water-based silane/siloxane water repellent for concrete and most masonry and stucco surfaces. Siloxane PD will not impair the natural breathing characteristics of treated surfaces. It helps masonry resist cracking, spalling, staining and other damage related to water intrusion.

Weather Seal

Siloxane WB Concentrate

is a concentrated water repellent designed for dilution with fresh water at the job site. This solvent-free blend of silanes and oligomeric alkoxy siloxanes mixes easily with water to produce a penetrating water repellent ideal for application to dense or porous masonry surfaces.

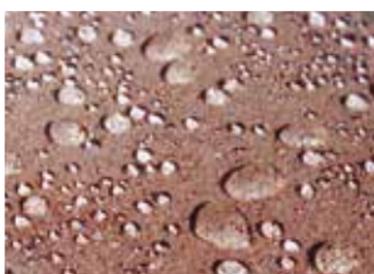

Weather Seal

Blok-Guard®

& Graffiti Control II

is a clear-drying, water-based silicone emulsion for weatherproofing concrete block and other porous masonry materials. Blok-Guard & Graffiti Control II protects interior and exterior masonry surfaces from graffiti attacks without altering the natural appearance.

Weather Seal

Natural Stone Treatment WB Plus

is a water-based water repellent for limestone, marble and travertine that delivers the same performance as solvent-based products, without the drawbacks of traditional water-based treatments.

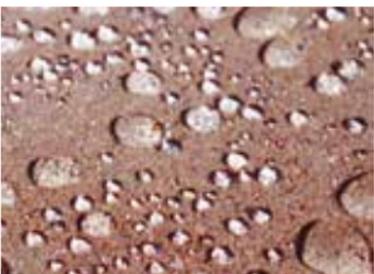

Weather Seal

Blok-Guard® &

Graffiti Control Ultra

is a clear, solvent-based silicone elastomer formulated to weatherproof concrete block and other porous masonry materials. Blok-Guard & Graffiti Control Ultra protects masonry surfaces from repeated graffiti attacks without altering the natural appearance.

Stand Off

SLX100® Water

& Oil Repellent

Combines water and oil repellency on most substrates to prevent staining by waterborne and oily substances. This modified “neat” silane system offers invisible protection and low volatility.

Never go it alone. For problems or questions, contact your local PROSOCO distributor or field representative. Or call PROSOCO Customer Care toll-free at 800-255-4255.
