

WINTER IS TOUGH ON CONCRETE

Protect it with Saltguard®

Repel water and provide a salt screen for horizontal and vertical concrete and masonry. Prevent the attack of corrosive water and water-carried de-icing salts.

APPLY

Saltguard® and Saltguard WB® are ready to apply.

Treat horizontal and vertical concrete and masonry, including concrete block, clay and concrete brick surfaces.

PROTECT

Saltguard® protects surfaces from moisture intrusion and chemical attacks of chloride salts, reducing rebar corrosion and surface spalling. Saltguard® also helps prevent and protect against deep-seated, waterborne contaminant staining.

ENDURE

Treated surfaces "breathe", they do not trap moisture.

Average service life of treatment is up to 10 years.

Which Saltguard® is right for you?

Saltguard®

Saltguard WB®

Screens chloride salts	✓	✓
Repels water	✓	✓
Makes surfaces easier to clean	✓	✓
