

DENSIFY, CURE & DUSTPROOF ALL-IN-ONE APPLICATION

PROSOCO DensiKure for smooth, steel-trowel finished concrete, combines a high performance densifier with a temporary, membrane-forming cure that is easily removed before applying Consolideck® protective treatments or coatings.

EASY

Applies with a pump-up, low-pressure (<50 psi) sprayer and dries in about 60 minutes. For use on both vertical and horizontal surfaces.

EFFECTIVE

Diminishes water loss from newly placed concrete and meets ASTM C309 moisture retention requirements. Improves abrasion-resistance and reduces surface dusting.

VERSATILE

Non-flammable. Non-toxic. Low odor. Available in most states and districts with more restrictive AIM VOC regulations.

Beautiful,
lasting
protection

Enhances the ultimate performance, surface sheen, and surface hardness of floors later treated with Consolideck® LS®, LS/CS®, or Blended Densifier.

Concrete Cure is compliant with the following national, state and district regulations:

- US Environmental Protection Agency
- California Air Resources Board SCM Districts
- South Coast Air Quality Management District
- Maricopa County, AZ
- Northeast Ozone Transport Commission

**WE ARE
WHERE
YOU ARE.**

PROSOCO's nationwide network of field reps and technical advisers from coast to coast are here to help solve your biggest problems, your smallest problems and everything in between.
