# CORNER UNITS AND END DAMS 

## SS ThruWall Flashing

## Creating an end dam

Crease flashing length-wise.

Fold flashing over 2" at the end.

Fold flashing length-wise. Pinch and turn the crease material upwards.

Pinch and turn the crease material upwards.

Finished product.

## Creating an inside corner

Cut a $12^{\prime \prime} \times 12^{\prime \prime}$ piece of flashing.

Fold in half vertically and horizontally.

Take one of the quarter panels \& evenly fold it into a triangle from the center.

Fold the triangle portion onto the adjacent panel.

Finished product.

## Creating an outside corner

Cut a 8 " $\times 10^{\prime \prime}$ piece of flashing. Fold in half and cut one side in half to the middle line.

Take a $10^{\prime \prime} \times 10^{\prime \prime}$ piece and cut a 4 " $^{\prime \prime} \times 4^{\prime \prime}$ notch out of it.

Place a bead of FastFlash on backer piece for connection with base piece.

Embed base piece to the backer piece and seal the top side with a bead of FastFlash. Tool joint with a dry trowel or spatula to create a profile that directs the water away from the joint.

## Creating interlocking lap joints
