

PROSOCO

THE RIGHT DENSIFIER FOR YOUR JOB

We stake our reputation on making densifiers that are the best in the industry because we know you stake your reputation on the durability and longevity of your floors. Selecting the right Consolideck densifier for your job's unique floor characteristics and circumstances is critical to achieving your desired results.

Grind & Polish

Grinding is a common practice used to remove damaged or deformed materials on the floor's surface. Polishing is the finishing touch used to make floors sparkle like new.

Recommended Densifier:
LS

Clean & Seal existing floors

Clean existing or new concrete slabs with an autoscrubber using PROSOCO Cleaner/Degreaser and sealing with a densifier.

Recommended Densifier:
LS/CS

Clean & Seal existing floors (with sheen)

Clean existing or new concrete slabs with an autoscrubber using PROSOCO Cleaner/Degreaser, seal with a densifier, then burnish to give your floor a sheen.

Recommended Densifier:
Blended Densifier

Dustproofing new slabs

Whether your floor is old or new, densifying is the best method to eliminate dusting on concrete.

Recommended Densifier:
LS/CS
